# EMERGENCY SHUTDOWN INSTRUCTIONS

## Natural gas smell in your home.

1. Do not try to light any appliance or relight the pilot light.
2. Do not touch any electrical switch or plug anything into any electrical outlets.
3. Immediately call your local gas company.

## No heat in your home.

1. Check the power switch to your furnace. Make sure it is in the "on" position.
2. Check your thermostat dial or digital setting to make sure the heat cycle is turned on.
3. For gas heat, check your pilot light to see if it is lit. If the pilot light is out, please call the number listed above.
4. Check for dirty or clogged air filters.
5. Check for a blown fuse in your circuit breaker box.

## No cooling in your home.

1. Check the power switch to your cooling unit. Make sure it is in the "on" position.
2. Check your thermostat dial or digital setting to make sure it is set to the cooling cycle.
3. Check for dirty or clogged air filters.
4. Check for a blown fuse in your circuit breaker box.
